DETAILED ACTION

1. Applicant's election without traverse of group I claims 10, 18 and claims 1-7, 9, 13, 15-17, 19-22 reading on $m=1$ in the reply filed on May 18, 2009 is acknowledged.

Claims 11-12, 14 have been canceled. The remaining subject matter of claims 1-7, 9, 13, 15-17, 19-22 wherein m is other than 1 are withdrawn from consideration per 37 CFR 1.1429b). cancellation of the non-elected subject matter is recommended.

2. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Please note that on page 5 of the claims, there are three compounds of the formula:

with  bonds or lines. It is unclear whether there are three compounds or one or different isomers.

Please note that such bonding notation does not offer any limitation to the structural formula. For stereo isomers the Dodge et al. CA 143:211843 reference is provided to show that only when the "S" or "R" notation was placed at the chiral center, will provide proper identification of isomers (see RN 862129-92-8).

3. Claims 1-10, 13, 15-21 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 7,399,867 in view of Bryant et al. US 5,554,628 and Dodge et al. US 5,811,421 supplemented with Greene.

Claim 1 of '867 is the compound:

While the instant claims are drawn to compound:

Art Unit: 1625

or the hydroxyl protection i.e by benzyl moiety of claim 17 which is the prima facie structural modification of the R¹⁰ is hydrogen compounds (see Greene p.11).

The difference is the replacement of the phenyl ring of the issued claim with a cyclohexyl moiety.

Bryant et al. '628 disclosed SERM compound as:

(see col. 26, example 11)

Dodge et al. '421 disclosed SERM compound as:

(see col. 23 example 6)

Therefore, the modification of the issued claim 1 phenyl with a cyclohexyl moiety, i.e. the instant claims, is prima facie optional choice in structure taught by the prior art. The employment of attribute of one proven compound in modifying another proven compound is prima facie obvious in absence of unexpected results.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang, Ph. D. whose telephone number is 571-272-0679. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.
